Trill Impact Ventures co-leads USD 25 million series B financing round in May Health

Advancing novel treatment for women suffering from Polycystic Ovary Syndrome related infertility.

Trill Impact Ventures, announces that it together with Bpifrance, has co-led a USD 25m series B financing round in May Health, a French-American medical device company targeting Polycystic Ovary Syndrome (PCOS) related infertility. The round also saw participation from existing May Health investor Sofinnova Partners. Proceeds will advance the clinical development of May Health's innovative device, as well as reaching CE marking that will enable market introduction in select European countries.

PCOS is the leading cause of female infertility¹, driven by lack of natural ovulation. May Health offers a novel approach to PCOS-related fertility and the upcoming REBALANCE study aims to demonstrate Ovarian Rebalancing™ as a safe and simple treatment option for activating natural ovulation.

In conjunction with the financing, Nina Rawal, Co-Head of Trill Impact Ventures and Partner at Trill Impact Advisory, will join May Health's board of directors, and Bitu Sehat, Senior Investment Director at Trill Impact Advisory, will join as an observer.

Commenting on the financing round, Nina Rawal said:

"We see May Health as a great example of a company where commercial opportunity and social impact go hand in hand. Trill Impact is excited to collaborate with the May Health team and its investors to bring their innovative product to women who have suffered from a lack of treatment options for too long".

Anne Morrissey, CEO of May Health commented:

"For the millions of women living with PCOS, the physical and emotional impact of this condition are profound. From fertility challenges to emotional well-being and physical symptoms, women with PCOS need more viable treatment options. We are thankful to Trill Impact and Bpifrance for co-leading this financing round, and to Sofinnova Partners for their confidence in our team and for their support of our strategy to build a global Women's Health company and to allow us to bring a solution for women with PCOS-related infertility issues".

SDG and Impact contribution:

Polycystic ovary syndrome (PCOS) is a hormonal disorder affecting 1:10 women globally and is the leading cause of female infertility². PCOS is a lifelong challenge that goes beyond fertility issues and is associated with insulin resistance, Type 2 diabetes, increased risk of cardiovascular disease, endometrial cancer as well as mental health issues such as depression and anxiety².

Through its products, May Health aims to contribute to several of the SDGs:

SDG 3.7 and SDG 5.6 – Ensure universal access to sexual and reproductive health-care services in accordance with ICPD and Beijing Platform for Action

SDG 3.4 – Reduce one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being.

SDG 3.4.1 – Reduce mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease.

About May About May Health

May Health is a clinical-stage medical device company committed to developing treatment options for women living with PCOS. The company is currently investigating its Ovarian Rebalancing™ treatment in clinical studies. Ovarian Rebalancing is a novel approach to PCOS-related fertility that has the potential to be a safe, straightforward option for activating natural ovulation. May Health is led by a team of serial medtech and women's health entrepreneurs and executives with extensive experience in product development, validation, and launch. The company was founded in 2017 by Sofinnova Partners' medtech acceleration team, MD Start. May Health is headquartered in Paris.
